CURRENT PROMOTIONAL PRICE

\$1000

[...] the secret lucrative money making evil mickey juice part, he provides full code for each case so you just have to copy and paste or do minimal editing. Through the quality and length of this course, I can clearly see that he's been working in the app market for 7 years, as he said, and I understand why he has to sell only 80 copies in high price. Pure gold for people who wanna make huge money in mobile apps / games because you will have to spend tons of time to collect / experience all of these by yourself and most of all, the evil monetizing parts. [...]

Although, the content was like 70% finished while the time of the review I found some really golden nuggets and with the help of the OP who happens to be super responsive I am going to make those small changes soon and I know the traffic will surely increase. The OP is a pro in this field and uses many of the methods inside the course himself. There is a lot to learn and everyone can benefit considering mobile is the future of technology.

Good Job!

TheVigilante

Long-story short it totally deserves the price that OP is asking. He has put a lot of info on the e-book, but that's not why it's so special to me. The thing that makes it one of the best courses I have ever purchased online is that there is no bullshit like many gurus sell their courses (cough Neil Patel). They only tell one part of the strategy, the other one you have to figure out yourself.

The other great thing about the course is that OP gives full support for all the members, isn't that cool? He sides with his courses only because he knows that many people will succeed with it, not like many other gurus who just put out courses that no longer work and leave the face of the earth.

My suggestion : Get inside of it before it's too late.

I was fortunate enough to receive a review copy of this course. After reading through the guide i felt that there was a ton of good information about making money with android apps. Having said that it might require some background knowledge about coding and the android platform before you can start making money. Nevertheless, it was a great read and definitely has the potential to make you a ton of money!

I have had our disagreements, some even regarding the viability of a course like the above. When I saw he was looking for some Jr. Exec reviewers for his course, I felt obliged to step in and offer my services. I wasn't expecting a response, but he quickly sent over unique login information for the course and let me know that he was available for any questions I had.

I am extremely impressed with what is being offered. [... READ MORE ON BHW]

Great stuff, I wasn't sure what to expect, and my expectations were pleasantly exceeded.

Introduction

Welcome in AndroidMoney.info website, the place where you can learn how to develop Android applications and the most important thing – the place where you can learn how to make bigger money from applications published in Google Play store. Most of Android developers are not making any money. They are publishing applications and fails because Google Play is very saturated store and competition is hard. Every day, 1000+ applications arrives to store and you need to compete with them. The only positive thing is that developers are not using any ASO or methods. We can beat them with some techniques. From this course you will learn how to do it.

Who am I to advice you?

I am Luke, indie Android developer but more a businessman. I am making money from Android development and Android Market (Google Play) for 2011. I earned a lot but also not amazing numbers. Currently my total earnings from Google Play are arround \$4mln. Not big but also not small number, especialy I

am working alone and not hiring any people. My way is different – publish a lot of apps in Google Play as much I can and defeat Google Play algorithms. I am working against rules and Google Play policy but never breaking any law. Methods presented in this course are legal but sometimes not moral. You can ask me and yourself, why I am sharing my knowledge? Course is expensive, money is money. Google cannot destroy these methods because they would need to invent Android from scratch. There are 180 000 Android Developers in Google Play. I think, few sales will not make me any competition. People are also very lazy, I figured out that maybe 1% of user wants to hard work and learning from my course. They buy it and forget. I see it on our course Discord – people are playing computer games for whole days. It's a shame.

[You can find me on BHW forums, where I am publishing high quality Android threads – I am reputable member of this community.](#)

What you get?

- access to course, each method is step by step tutorial with source code or images
- access to course Discord, community with buyers, to discuss about Google Play
- source codes from SellMyApp/Codecanyon/Chupamobile worth \$15 000, ready to reskin and use in your applications
- support 1h/week, mostly weekends, to talk about your business

Check the tab in menu to see course content!
